

Applications Engineer

Become an Applications Engineer for SLM Solutions NA, Inc., where you will work in the exciting and growing additive manufacturing market. We are looking for a candidate to work at our North American office in Wixom, Michigan.

COMPANY DESCRIPTION:

SLM Solutions is a leading provider of metal-based additive manufacturing technology, commonly referred to as 3D printers, utilizing selective laser melting and powder bed fusion technology. Our 3D printers are designed to produce parts directly from a variety of metal powders. The customers for our metal based additive manufacturing systems come from various industries such as aerospace, energy, healthcare, and automotive. Headquartered in Lübeck Germany, SLM Solutions has approximately 420 employees worldwide.

POSITION DESCRIPTION:

An SLM Solutions Applications Engineer provides support to internal and external customers by applying their knowledge and experience of producing 3D printed components using SLM Solutions machines. This position is primarily focused on pre-sales support activities as needed by the Sales and Marketing teams, and post-sales support activities driven by customer needs. The Applications Engineer is an expert in all aspects of application and use of SLM technology and parts produced using SLM machines and will use these skills on a daily basis. The Applications Engineer will be responsible to lead efforts on multiple activities to support the needs of the organization.

Occasional travel is estimated to be approximately 20%, and fluctuates with business needs.

The starting salary for this position will be commensurate with qualifications and experience.

CANDIDATE REQUIREMENTS:

Required Education and Experience:

- Associates or bachelor's degree in Mechanical or Materials/Metallurgical Engineering, Electrical or Automation Technology, or similar.
- Practical, hands-on mechanical and electrical operation experience with industrial equipment.
- Software experience: CAD softwares, part and data preparation softwares, such as Materialise Magics, Autodesk Netfabb, etc.
- Demonstrated experience in training others in the use of complex industrial products.
- Ability to follow written instructions and maintain written records.
- Ability to travel internationally if requested.
- Experience requiring use of organizational skills.
- Ability to learn how to operate complex machinery.
- Experience with Microsoft Office programs (Outlook, Excel, Word)

Other Desired Qualifications:

- Experience with 3D printing technology.
- Hands-on experience with automation systems in manufacturing plants.
- Bi-lingual English + German.
- Computer hardware/software set-up experience.

Our Comprehensive Benefits Package Includes:

- Competitive Compensation – the starting salary for this position will be commensurate with qualifications and experience.
- Medical, dental, and vision insurance.
- Short Term Disability Insurance.
- 401K with Company Match.
- Flexible Spending Account.
